PAPER 2 (Structured Questions)

2 hours

Marks 85

2018

Additional Material: Non-programmable calculator

INSTRUCTIONS AND INFORMATION TO CANDIDATES

- Candidates answer on the Question Paper in the spaces provided.
- Write your Candidate Number and Name in the spaces at the top of this page.

- Answer **all** questions.
- **All working must be shown clearly.**
- Write in dark blue or black pen.
- You may use a non-programmable calculator.
- Do not use correction fluid.
- Do not write in the margin *For Examiner's Use*.

- If an answer is not exact, it should be rounded to **one** decimal place and for money give your answer to **two** decimal places.
- The number of marks available is shown in brackets [] after each question or part question.

<i>For Examiner's Use</i>	
<i>Marker</i>	
<i>Checker</i>	

This document consists of **13** printed pages.

- 1 (a) Work out $\sqrt{88} - \sqrt{49} + \sqrt{9}$. Write down your **full** calculator display.

Answer (a) [1]

- (b) Write your answer in (a) to 2 decimal places.

Answer (b) [1]

- 2 5 6 10 11 21 101 125 128

From the list of numbers above choose

- (a) a prime factor of 33,

Answer (a) [1]

- (b) a cube number,

Answer (b) [1]

- (c) a multiple of 7,

Answer (c) [1]

- (d) a power of 2.

Answer (d) [1]

- 3 Choose one of the signs =; < or > to make the following statements true.

(a) 5.6729×10^{-3} 5.213×10^{-2} .

(b) $\left(\sqrt{\frac{1}{4}}\right)^2$ $\left(\frac{1}{2}\right)^3$.

(c) 2^4 4^2 . [3]

- 4 Arrange the following numbers in order of size, starting with the smallest.

0.25, $\left(\frac{1}{2}\right)^0$, 8, $\frac{1}{8}$

Answer < < < [2]

- 5 On a cold Saturday winter evening, the temperature in Thadeus's room was -2°C . His sister Natalia was using a heater and her room temperature was 25°C . Calculate the difference in temperature between Thadeus' and Natalia's room.

Answer..... $^{\circ}\text{C}$ [2]

- 6 The ratio of Obert's height to Vickey's height is 6 : 5.

- (a) Obert's height is 180 cm.
Calculate Vickey's height.

Answer (a) cm [2]

- (b) The mass of Obert and Vickey is in the same ratio as their heights. The total of their masses is 121 kg.
Find Obert's mass.

Answer (b) kg [2]

- 7 (a) List all the factors of 20.

Answer (a) [2]

- (b) Write 35 as a product of its prime factors.

Answer (b) [1]

- (c) Find the lowest common multiple of 20 and 35.

Answer (c) [1]

- 8 The population of Divundu town is 5 430. Write this population in standard form.

Answer [2]

- 9 A ship has sufficient food to supply 600 passengers for 3 weeks.
How long would the food last for 800 passengers if they all eat at the same rate?

Answer weeks [2]

- 10 Expand and simplify $3x + 2(x + 1)$.

Answer [2]

- 11 Solve the equation $6 + 2a = 3$.

Answer $a =$ [2]

- 12 Pandu sell fruits and vegetable after school at their mother's stall at the open market. Her mother pays her 8% of the total profit for the day. If the mother made a profit of N\$213 on a certain day.
Calculate how much Pandu's mother must pay her for that day?

Answer N\$ [2]

- 13 The cash price of a smartphone is N\$14 750.

There are two possible options to buy the smartphone.

OPTION 1: To get a personal bank loan of N\$14 750 at 27% simple interest for 2 years.

- (a) Calculate the interest to be paid to the bank.

Answer (a) N\$..... [2]

- (b) Find the total amount to be paid after 2 years to the bank.

Answer (b) N\$ [1]

OPTION 2 : To buy it on a hire purchase, with 20% deposit of the cash price and 24 monthly installments of N\$920 each.

- (c) Calculate the deposit.

Answer (c) N\$..... [2]

- (d) Work out the total amount to be paid on hire purchase.

Answer (d) N\$..... [1]

- (e) Determine which of the two options is cheaper.

Answer (e) [1]

14 Ms Ochurus's taxable income is N\$80 000 per year.

Her tax is calculated as follows : **N\$750 plus 18% of the taxable income.**

(a) Calculate the amount of tax Ms Ochurus pays per year.

Answer **(a)** N\$ [2]

(b) Work out the amount of tax she pays per month.

Answer **(b)** N\$ [1]

- 15** The diagram shows a glass jug. The jug is a cylinder of radius 6 cm and a height of 16 cm.

(Use $\pi = \frac{22}{7}$ or 3.142)

- (a) (i)** Calculate the area of the base of the jug.

Answer **(a) (i)** cm² [2]

- (ii)** Calculate the volume of the jug in cm³.

Answer **(a) (ii)** cm³ [2]

- (iii)** Convert your answer in **(a) (i)** to litres (*l*).

Answer **(a) (iii)** *l* [1]

- (b)** If there is 1 650 cm³ of water in the jug.

- (i)** Calculate the height of water in the jug in centimetres.

Answer **(b) (i)** cm [2]

- (ii)** How many 330 cm³ glasses can be filled from the 1 650 cm³ of water in the jug?

Answer **(b) (ii)** glasses [1]

16 (a)

Calculate the value of z .

Answer (a) $z = \dots\dots\dots^\circ$ [2]

(b)

Find the value of w .

Answer (b) $w = \dots\dots\dots^\circ$ [2]

17 The diagram shows a regular polygon.

(a) Give a geometrical name for the polygon.

Answer (a) [1]

(b) Calculate the exterior angle, x , of the polygon.

Answer (b) $x = \dots\dots\dots^\circ$ [2]

(a) Describe fully the single transformation that maps triangle **T** onto triangle **A**.

Answer (a)

..... [3]

(b) Triangle **B** is an enlargement of triangle **T**, give

(i) the scale factor of the enlargement,

Answer (b) (i) [1]

(ii) the centre of enlargement.

Answer (b) (ii) (..... ,) [1]

(c) Reflect triangle **T** in the line $x = -1$. Label it **C**.

[2]

19 Diagram **A** is a square and diagram **B** is a rectangle.

(a) Find the area of diagram **A** in terms of a .

Answer (a) [1]

(b) Find the perimeter of diagram **B** in terms of a and b .

Answer (b) [2]

(c) If $a = 4$ cm and $b = 5$ cm.

Work out the perimeter of diagram **B**.

Answer (c) cm [2]

20 The diagram shows a line graph which passes through the points **P** and **Q**.

(a) Determine the y -intercept of the line.

Answer (a) [1]

(b) Write down the co-ordinates of point **P**.

Answer (b) (.....,) [2]

(c) Find the gradient of line **PQ**.

Answer (c) [2]

21 Khobetsi keeps a record of the marks he received in ten tests. The frequency table below shows his results.

Marks	7	8	9	10
Frequency	5	2	2	1

(a) In how many tests did Khobetsi receive 9 marks?

Answer (a)tests [1]

(b) (i) Find the mode of the marks.

Answer (b) (i)..... [1]

(ii) Find the mean mark.

Answer (b) (ii) [3]

22 Cornè chooses a card at random from the following cards.

Find the probability that the letter taken is

(a) an A,

Answer (a) [1]

(b) a C,

Answer (b) [1]

(c) a T.

Answer (c) [1]

- 23** The diagram shows a flagpole (BC). A is a point on the ground with $AB = 9$ m and $AC = 6.5$ m.

- (a)** Calculate the value of x .

Answer **(a)** $x = \dots\dots\dots^\circ$ [2]

- (b)** Work out the height of the flagpole.

Answer **(b)** $\dots\dots\dots$ m [2]
